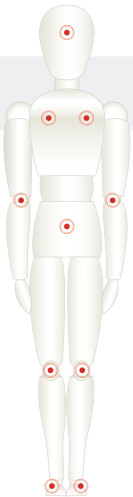
Advantages of AKTON viscoelastic polymer

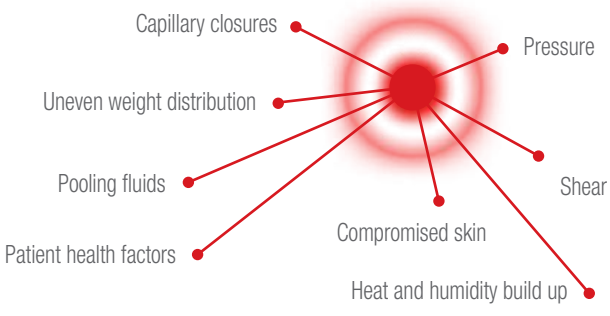
- Excellent shear reducing qualities
- Soft, flexible film
- Enhances patient stability
- Evenly distributes heat and pressure
- Clinically proven to help prevent pressure injuries
- Reusable & Cost Effective
- Does not support bacterial growth
- Hypoallergenic
- Imaging compatible
- Biocompatible
- Hypo-allergenic
- Not made with natural rubber latex
- Free of phthalates, plasticizers & silicone
- Free of DEHP

Our reusable pads and positioners are impervious to fluids, will not support bacterial growth, do not leak or flow if punctured, and are easy to clean and maintain.

The shear reducing qualities of the products are enhanced by the combination of the soft, flexible outer film and the tissue equivalent polymer.



FACTORS CONTRIBUTING TO PRESSURE ULCERS:



How our proprietary polymer reduces the risk...

The ultrasoft polymer combined with the soft, flexible surface of our pads allows the product to move with the patient, reducing negative effects of shear on fragile skin. In addition, the Akton® polymer distributes weight and dissipates heat; reducing the risk of high-pressure points and hot spot development that can lead to pressure injuries. These combined benefits enhance patient protection.

Look for authentic Akton® polymer

Overlays

The Action® O.R. Overlay is a versatile polymer pad used for a wide range of procedures. Its shear reducing qualities combined with the ability to distribute heat and pressure make it a valuable pressure management tool.

Used in longer procedures or for patients with fragile skin integrity, the overlay is an affordable upgrade for basic foam table pads that provides enhanced patient protection. The overlays are portable and can be exchanged between rooms as needed and are available in all standard OR table footprints in 1/2" thickness. Disposable covers are available for select overlay models.

AORN 2025 Guidelines, Pressure Injury Prevention
Selecting and Using Support Surfaces, section 3.2

"Position patients on surfaces that reduce the potential for PI by redistributing pressure and reducing the risk of unintended patient movement.... Static surfaces such as viscoelastic polymer (i.e., gel) overlays are designed to reduce shearing and to support the patient's weight without becoming fully compressed under the weight of the patient's body.[5,46,74] Gel overlays are radiolucent, latex-free, and reusable.[74]

Disposable Overlay Covers

Action's fluid-resistant, non-sterile Disposable Overlay Covers are made of a soft, flexible film and are available in two styles. They are designed to help reduce exposure to fluids and to help extend the life of the overlay.

The "pillowcase" style is closed at one end and fully encases the overlay like a sheath.

The "fitted sheet" style covers the top of the pad and is held in place by two pockets at each end of the cover. This cover has a 4" film drape that runs the length of the cover on both sides.

Supine Head Pad

The Supine Head Pad features a dual layer foam and polymer construction. The supportive foam base has a 6" circular cutout positioned beneath the soft, flexible polymer pad.

The foam cutout allows the 1" moderately dished polymer pad to immerse the occiput into the pad, creating a cradling effect that increases surface contact, lowers pressure, and gently positions the head. The entire head pad is encased in a fluid-resistant, flexible film cover to protect the porous foam base from contaminants and should not be removed.

Contoured Head Pad

The contoured design provides stability of the patient's head while in the supine position.

40213	7 ⅝ L x 7 ⅝ W x 3" H (1 ½" contoured)	19.4 x 19.4 x 7.6 cm	

Forehead Protector

The Forehead Protector is semi-circular with a flat bottom. It is used to protect the infant, child or adult patient's forehead from pressure exerted by oxygen tubes.

40208	2 ½ L x 1 ⅝ W x ⅝" H	6.4 x 4.1 x 1.6 cm	

Prone Headrests

Our popular Prone Headrest is designed to support the patient's head in a straight, neutral position during prone procedures. Sculpted central cutout is designed to avoid pressure around eyes, nose, and face. Soft, Akton® polymer surface helps reduce shear at the forehead and chin support area. Channels present in top and base of pad provide tube access for the anesthesiologist.

40216M	Medium	8 ¾ L x 7 ¾ W x 4 ¾" H	22.2 x 19.7 x 12 cm

Ophthalmic Cradle Headrest

The unique contours of this supine head pad offer broad support for the neck of the patient while positioning the head in an oval center dish to reduce pressure and improve head stability during use. Suitable for most supine procedures, the head pad was originally designed for longer ophthalmic surgeries and features two raised areas on each side of the pad to offer soft support for a surgeon's hands. Well-suited option for patients requiring additional neck support.

40217	Adult	10 ½ L x 9 W x 2 ⅝" H	26.7 x 22.9 x 6.7 cm

Ophthalmic Headrests

This Ophthalmic Headrest features a deep contoured cutout that cradles the head and helps enhance stability. Its robust, soft sides are designed to lessen surgeon fatigue and offer wrist and hand support during ophthalmic, facial, or oral procedures.

40209	Large	10 L x 12 W x 3 ⅞" H	25.4 x 30.5 x 9.8 cm
40210	Medium	10 L x 12 W x 2 ⅞" H	25.4 x 30.5 x 7.3 cm

Horseshoe Head Pads

The horseshoe configuration provides a clear air passageway and aids the anesthesiologist while patients are in a lateral and prone position, head to side.

40204	Adult	8 OD x 3 ID x 1 ¾ H"	20.3 OD x 7.6 ID x 4.5 cm
40211	Adult, High	8 OD x 3 ID x 3 H"	20.3 OD x 7.6 ID x 7.6 cm

Chest Rolls

This line of flat bottom chest rolls is designed to provide stable support in the prone position. They are available in a wide range of heights and lengths to accommodate virtually any patient, adult to neonate.

Disposable Chest Roll Covers

Action's fluid-resistant, non-sterile Disposable Chest Roll Covers are made of a soft, flexible film designed to extend the life of the chest roll and reduce exposure to fluids during use.

The slip-on covers mimic size and shape of the chest roll and have an overlapping film flap along the flat bottom.

Purchase in cases of 25.

Peg Board Pad Set

The Action® Peg Board Pad set complements most standard peg board positioning systems. This multi-piece set is designed to protect patient skin and soft tissue from damaging pressure and shear forces while in the high-pressure lateral position.

The medium-length overlay (Item #40100) lies atop the peg board (beneath the patient) while the adjustable peg post pads of varying lengths easily wrap around the pegs and are secured by hook and loop attachment. Overlay and peg pads are available as a set, or as individual units.

Set (#40719) includes:

- 1 Medium Overlay Pad, #40100
- 4 Short Peg Post Pads, #40719A
- 4 Tall Peg Post Pads, #40719B
