CHEMICAL INDICATOR TAPES/ STRIPS

CLASS 6 Emulating Steam Indicator Dual Strips

Type 6 Emulating Indicators are part of an effective quality assurance program. It helps identify possible sterilization process failures that may result from improper packaging, improper loading or improper operation of the sterilizer. Emulating indicators change color when the specified parameter is provided. One emulator should be used in each sterilization package to ensure that the steam penetrates the packaging material and reaches the tools inside. These emulating indicators can be used for routine monitoring of steam sterilization cycles.

- Water-based and non-toxic chemical indicator is used.
- It is easy to read and interpret.
- Compatible with ISO 11140-1.
- Self-Adhesive versions can be used as a permanent record for traceability purposes.

Code	Description	Size
• NK-C-1035	Class/Type 6 Emulating Triple Indicator	25 x 65mm

Steam Indicator Tapes

A reliable sterilization tape that provides immediate identification of processed items and also serves as a closure tape to seal sterilization packs. Chemical indicator strips change color when exposed to appropriate sterilization conditions.

The sterilization tapes are suitable for steam, ethylene oxide and hydrogen peroxide sterilization processes.

- Water-based and non-toxic chemical indicator is used.
- It adheres to woven, treated woven, non-woven, paper and paper/plastic wraps.
- The adhesive feature ensures that the winding material is safely packed and removed from the material in a clean/ easy way.
- Compatible with ISO 11140-1.

Sterilization tape changes color when subjected to sterilization process. It is important to note that the presence of sterilization tape that has changed color on an item does not ensure that the product is sterile, the tape only shows if sterilization has been performed.

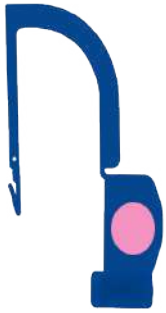
Code	Description	Size
• NK-E-2550	Ethylene Oxide Tape	25mm x 5m

Plastic Container Security Seals

NK-C-1072

Containers are sealed with plastic security seals for single-use, these can be open only by cracking. Plastic security seals are safeguarding the container against unauthorized opening. It is the easiest method of quickly identifying or marking instruments, trays, trolleys or other equipment.

- Water-based and non-toxic chemical indicator is used.
- It is easy to read and interpret.
- Compatible with ISO 11140-1.



NK-C-1203

Code	Description	Size
• NK-C-1072	**Plastic Container Security Seals** (With Indicator)	27 x 50mm
• NK-C-1203	**Long Plastic Container Security Seals** (With Indicator)	50 x 50mm
